Dear HR Manager,

This letter is being written to express my interest in the Summer Data Analytics Intern position located in Emeryville. With my current pursuit of a Bachelor's degree in Computer Science and my hands-on experience with machine learning, data science, and computer graphics, I am sure that I would be a great asset to your organization.

I enjoy being presented with a challenging project that forces me to get outside of my comfort zone and learn in a fast pace environment. I am always looking for ways to learn new skills and technologies to help become a more successful developer.

Some important background about me that would allow for me to effectively contribute to the success of the organization is that I am doing mentored research with faculty involving machine learning. In this research, we built a machine learning and natural language processing pipeline using Python, and have used it to generate findings that we submitted to the IEEE ICSC 2018 conference.

Attached in my application is my resume which details my past work experience and personal projects for software development. I can be reached via cell phone at 856-905-6074 or by email at beattyg2@tcnj.edu. Thank you for your time and I look forward to speaking to you about the position.

Thank you,

**Garrett Beatty**
